Professional Summary

Fullstack Software Engineer with 4 years of experience building reliable systems across healthtech and martech startups. Highly proficient in AWS-based deployments, distributed systems, real-time data pipelines and cross platform UI development. Adaptive to driving end-to-end delivery, mentoring teams and optimising performance under high SLAs.

Experience

Freelance Software Engineer

Mar 2026 - Present

- Developed an internal full stack mobile app using NestJS, PostgreSQL, Redis, AWS and React Native to manage appointments, assign crews, track service status, and manage business finance.
- Designed and built an appointment booking website for a field service business supporting online scheduling, automated booking confirmations, and service inventory management.

Hinge Health

Oct 2025 - Feb 2026

Software Engineer II

Bengaluru

- Owned backend changes across User Service and eligibility integrations for a versioned member intake contract, translating new onboarding payloads into profile and eligibility domain models, maintaining downstream care-program consumers.
- Built QA automation for User Service to generate test users, simulate eligibility states, and validate onboarding flows and downstream consumer health, cutting service level release validation time by ~80%.
- Built a Next.js/TypeScript interface for an internal **AI legal assistant**, delivering streaming search, contextual knowledge buckets, and citation-driven document navigation to help legal teams explore **100+** page policy documents.
- Revamped the onboarding health assessment workflow with interactive conditional forms, autosave, and progress persistence.

Astria Digital

Jun 2024 - May 2025

Software Engineer

Bengaluru

- Engineered full-stack mobile/web agent platform using Node.JS, AWS, Twilio and React Native, enabling **20 concurrent agents** to handle inbound customer calls with real-time routing and post-call analysis.
- Architected observability pipeline for **12+** distributed services, integrating tracing and alerting to reduce MTTD to <5 minutes.

Lifesight

Jul 2022 - May 2024

Associate Software Engineer

Bengaluru

- Built the analytics backend for **attribution** by designing computation services and low-latency APIs over marketing datasets.
- Owned the frontend development of **Attribution**, **Marketing Mix Modeling** and **Incrementality** modules, building analytics dashboards with **fusion charts**, multi-step experiment configuration forms and dynamic filtering.
- Implemented **Web Push notifications**, **Whatsapp Cloud messaging** with merge tags and a **minimum-click Sign in with Shopify**.

Projects

ImageToCode | IBM Bob Dev Day Hackathon 2026

Multi Agent AI CLI that converts UI screenshots into HTML/CSS using a coder-evaluator loop with Playwright-based rendering.

HeroAI | Hinge Health | Hackfest 2026

An agentic PR auto-healer AI workflow that triggers when CI fails, analyzes the error logs, and pushes a fix to the branch.

Udooh web application

A hyperlocal marketing platform, enabling dynamic, location-specific ads on digital screens, tailored for brands, enterprise & SMEs.

Technical Skills

Programming & Scripting: JavaScript/TypeScript, Python, Shell Scripting

Backend & AI: Node.js, NestJS, FastAPI, JWT, OAuth, RBAC, WebSockets, Nginx, LangChain, LangGraph, RAG, MCP, Claude/OpenAI API

Frontend: React, React Native, Next.js, Expo, Webpack, Jest, Redux, SCSS, Tailwind, GSAP, Unlayer

Data Platform & Engineering: PostgreSQL, MongoDB, S3, RDS, Opensearch, Redis, Kafka, EKS, Lambda

DevOps & Tools: Linux, AWS, Docker, Kubernetes, Jenkins, Railway, Git, Bitbucket, Datadog

Education

PES University, Bengaluru

2018 - 2022

B.Tech in Computer Science and Engineering

Delhi Public School Ruby Park, Kolkata

2018

CBSE (XII)
