

SHUBHAM KUMAR SAHOO

FULL STACK ENGINEER | BACKEND & DISTRIBUTED SYSTEMS

📞 9147736966 ✉️ shubhamk2907@gmail.com [Portfolio](#) [LinkedIn](#) [Github](#)

Professional Summary

Fullstack Software Engineer with 3+ years of experience building reliable systems across healthtech and martech startups. Proficient in AWS-based deployments, distributed systems, real-time data pipelines and UI development. Proven expertise in driving end-to-end delivery, mentoring teams and optimising performance under high SLAs.

Experience

Hinge Health

Oct 2025 - Feb 2026

Software Engineer II

Bengaluru

- Owned backend changes across User Service for a versioned member intake contract, handling **50K+** requests/day and **30K+** member intakes/month.
- Moved trigger-heavy database flows onto Kafka and RabbitMQ event streams that now process **10M+** messages a day.
- Owned architecture decisions around service decomposition, failure handling, and phased rollouts during migration from Ruby On Rails monolith to a NestJS microservice.
- Set up review standards and CI gates that cut deployment incidents and made rollbacks routine.

Astria Digital

Feb 2025 - May 2025

Software Engineer

Bengaluru

- Engineered full stack web agent platform using NodeJS, AWS, Twilio SDK and React, enabling **20+** concurrent agents to handle inbound customer calls with real-time routing and post-call analysis.
- Added targeted test coverage around risky code paths. Post-release defects dropped by **60%**.
- Built **30+** reusable React components forming a shared design system across mobile and web.

Udooh

Jun 2024 - Jan 2025

Founding Lead Engineer

Bengaluru

- Owned technical architecture and end-to-end delivery across application development, database design, auth, testing, CI/CD and AWS production infrastructure.
- Containerized backend services and implemented service-to-service access controls, IAM permissions, load balancing, centralized logging, monitoring and production deployment workflows.
- Evaluated and migrated the production infrastructure to a lightweight container orchestration architecture, reducing monthly AWS infrastructure costs by **~72.5%** while supporting concurrent operation across **10+** connected screens.
- Designed and built role based interfaces on React for merchants and advertisers to manage hyperlocal ads across locations.

Lifesight

Jul 2022 - May 2024

Associate Software Engineer

Bengaluru

- Owned the frontend development of Attribution, Marketing Mix Modeling and Incrementality modules, building analytics dashboards with fusion charts, multi-step experiment configuration forms and dynamic filtering.
- Found and fixed slow queries and missing indexes that were dragging down critical workflow latency.
- Went from trainee to shipping full stack features for D2C Shopify customers and learned about product behaviour.

Projects

Udooh web application

A hyperlocal marketing platform, enabling dynamic, location-specific ads on digital screens, tailored for brands, enterprise & SMEs.

ImageToCode | IBM Bob Dev Day Hackathon 2026

Multi Agent AI CLI that converts UI screenshots into HTML/CSS using a coder-evaluator loop with Playwright-based rendering.

Technical Skills

Programming & Scripting: Java, TypeScript/JavaScript, Shell Scripting

Backend: Spring Boot/MVC/Data JPA/Security, Hibernate, Maven, Junit, NodeJS, NestJS, JWT, OAuth 2.0, RBAC, Microservices

Frontend: React, Next.js, Webpack, Jest, RTL, Redux, SCSS, Tailwind

Data & Messaging: PostgreSQL, MongoDB, Redis, Kafka, Amazon RDS, Amazon S3, OpenSearch

Cloud & DevOps: AWS, Docker, Docker Swarm, Kubernetes, Nginx, Linux, Jenkins, Git, Bitbucket, Datadog

Education

PES University

2018 - 2022

B.Tech (Computer Science and Engineering)
